

## **In Office Visit During COVID Patient Authorization and Consent Form**

During the COVID-19 pandemic, there is some increased risk for patients who visit a healthcare provider. Health problems can happen from being exposed to:

- other patients,
- healthcare staff, or
- healthcare facilities.

Some patients have a higher risk of complications from COVID-19, including those with:

- asthma,
- chronic lung disease,
- serious heart disease or problems,
- chronic kidney disease,
- extreme obesity,
- a compromised or suppressed immune system,
- liver disease,
- pregnant,
- age 65 or older, or
- nursing home or long-term care facility residents.

If these high-risk patients get COVID-19, they may have a greater chance for having more health problems. These may be serious. Patients may need to be in the hospital. They could even die.

### **Other Evaluation and Treatment Choices**

There may be other ways to meet with your doctor and be treated. You could have:

- a phone evaluation or
- a telehealth evaluation.

These other options may or may not be right for you. This depends on your health problem and overall health. If remote assessment and treatment are not appropriate, your doctor will explain why you need an in-person visit.

### **More Facts**

Medical and office staff may help your doctor when you arrive and while you are evaluated and treated. They will follow state laws and recommendations from local, state, and national health officials related to caring for patients during the COVID-19 pandemic. However, they cannot eliminate risks, especially for high-risk patients.
